In order to keep up to date, this is the 11th edition of the book in the past 8 years. So many new events are taking place all the time in the area of vaccines, events which are simply left out of the news media. For example:

Here is a chart of the required number of childhood vaccines in recent years:

2003	40 vaccines
2004	53 vaccines
2005	58 vaccines
2006	63 vaccines
2007	69 vaccines

Why is this number going up every year now, and you never read about it?

Also in the new book:

Learn why they vaccinate your child on the day of birth

Uncover why many physicians boycott school vaccination programs

Learn what the FDA and CDC seem to be ignoring

PLUS: Vital Information About These Important Child Health Issues

Please understand this -- A fearsome battle is lining up today in our brave new world. It's as though we're being forced to draw the line to a new threat - an assault on the blood of our children. This is not just a figure of speech. New vaccines are being invented every year, all with the same hope - to be included in the mandated Immunization Schedule.

Our infant mortality rate and the health of our children are appalling. The incidence of both infectious diseases and degenerative diseases among adult Americans is skyrocketing.

Here's what top educators from all over the country are saying about this unique work on Vaccination and Immunization:
